

# INVESTOR PRESENTATION

---

## Fuelling the transition

July 2024

**ASX: IEC**

## Forward Looking Statements

This presentation may contain forward-looking statements, guidance, forecasts, estimates, prospects, projections or statements in relation to future matters that may involve risks or uncertainties and may involve significant items of subjective judgement and assumptions of future events that may or may not eventuate (Forward Statements). Forward Statements can generally be identified by the use of forward looking words such as "anticipate", "estimates", "will", "should", "could", "may", "expects", "plans", "forecast", "target" or similar expressions. Forward Statements including indications, guidance or outlook on future revenues, distributions or financial position and performance or return or growth in underlying investments are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. To the extent that certain statements contained in this presentation may constitute 'Forward Statements' or statements about forward looking matters, then the information reflects the Company's (and no other party's) intent, belief or expectations as at the date of this presentation. No independent third party has reviewed the reasonableness of any such statements or assumptions. None of the Company, its related bodies corporate and their respective officers, directors, employees, advisers, partners, affiliates and agents (together, the IEC Parties) represent or warrant that such Forward Statements will be achieved or will prove to be correct or gives any warranty, express or implied, as to the accuracy, completeness, likelihood of achievement or reasonableness of any Forward Statement contained in this presentation. Except as required by law or regulation, the Company assumes no obligation to release updates or revisions to Forward Statements to reflect any changes. Recipients should form their own views as to these matters and any assumptions on which any of the Forward Statements are based and not place reliance on such statements.

All dollar values are in Australian dollars (\$) or A\$ unless otherwise stated.

## Disclaimer

No party other than the Company has authorised, permitted or caused the issue, submission, dispatch or provision of this presentation, or takes any responsibility for, or makes or purports to make any statement, representation or undertaking in this presentation and there is no statement in this presentation that is based on any statement by any other party. No person, either as a director, partner or in the employment of the Company has any authority to make, imply, or give any representation or warranty whatsoever in relation to the information contained in this presentation. None of the IEC Parties take any responsibility for any information in this presentation or any action taken by you on the basis of such information.

To the maximum extent permitted by law, the IEC Parties:

Exclude and disclaim all liability, including (without limitation) any liability for fraud or negligence, for any expenses, losses, damages or costs incurred either as a result of the information in this presentation being inaccurate or incomplete in any way for any reason, or otherwise arising in connection with this presentation; and

Make no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of information in this presentation.

The exploration results at the Yalgarra Project were first announced by the Company on 23 January and 7 and 9 February 2023. The Company confirms that it is not aware of any new information or data that materially affects the information contained in the announcements.

- 1 Diversified project portfolio (Li, Au, Cu-Co-PGE) in **tier-1 jurisdictions** – Australia and Canada
- 2 **Compelling geology** – significant scale potential and world class neighbours
- 3 Maggie Hays Hill Project – High-quality lithium and gold **drill targets defined** by field mapping and soil geochemistry
- 4 **World class neighbours** – West Yilgarn (ASX:RIO/CHR, ASX:TG6) and James Bay (ASX:WR1, ASX:PMT, NYSE:ALTM, TSE:NMX)
- 5 Compelling company valuation **~\$3 million market cap**, \$1.9 million cash<sup>1</sup> and spodumene price optionality
- 6 Commodity exposures supported by **strong market fundamentals**

<sup>1</sup> Cash position as of 31 March 2024.

# Corporate Snapshot

ASX Code   IEC	
Ordinary Shares on issue	1,690,781,588
Options (ex. performance rights)	674,500,000
Market Cap (basic)	\$3.4M
Enterprise Value	\$1.5M
Cash (31-Mar-24)	\$1.9M

**Graeme Robertson**  
Non-executive Chairman

40+ years experience in mine development including as President Director of Adaro Indonesia and extensive expertise in equity markets. Currently Chairman of Intrasia Capital in Singapore.

**Ben Dunn**  
Managing Director

20+ years of international experience in legal, equity and capital markets in Australia and Asia, primarily in the resources sector. Held senior positions with Citigroup, JP Morgan and CLSA.

**Alan Fraser**  
Non-executive Director

30+ years' experience in greenfield mineral exploration, project management and mine construction.

Experience in managing base metal and gold exploration projects through joint venture negotiation and obtaining regulatory approvals.

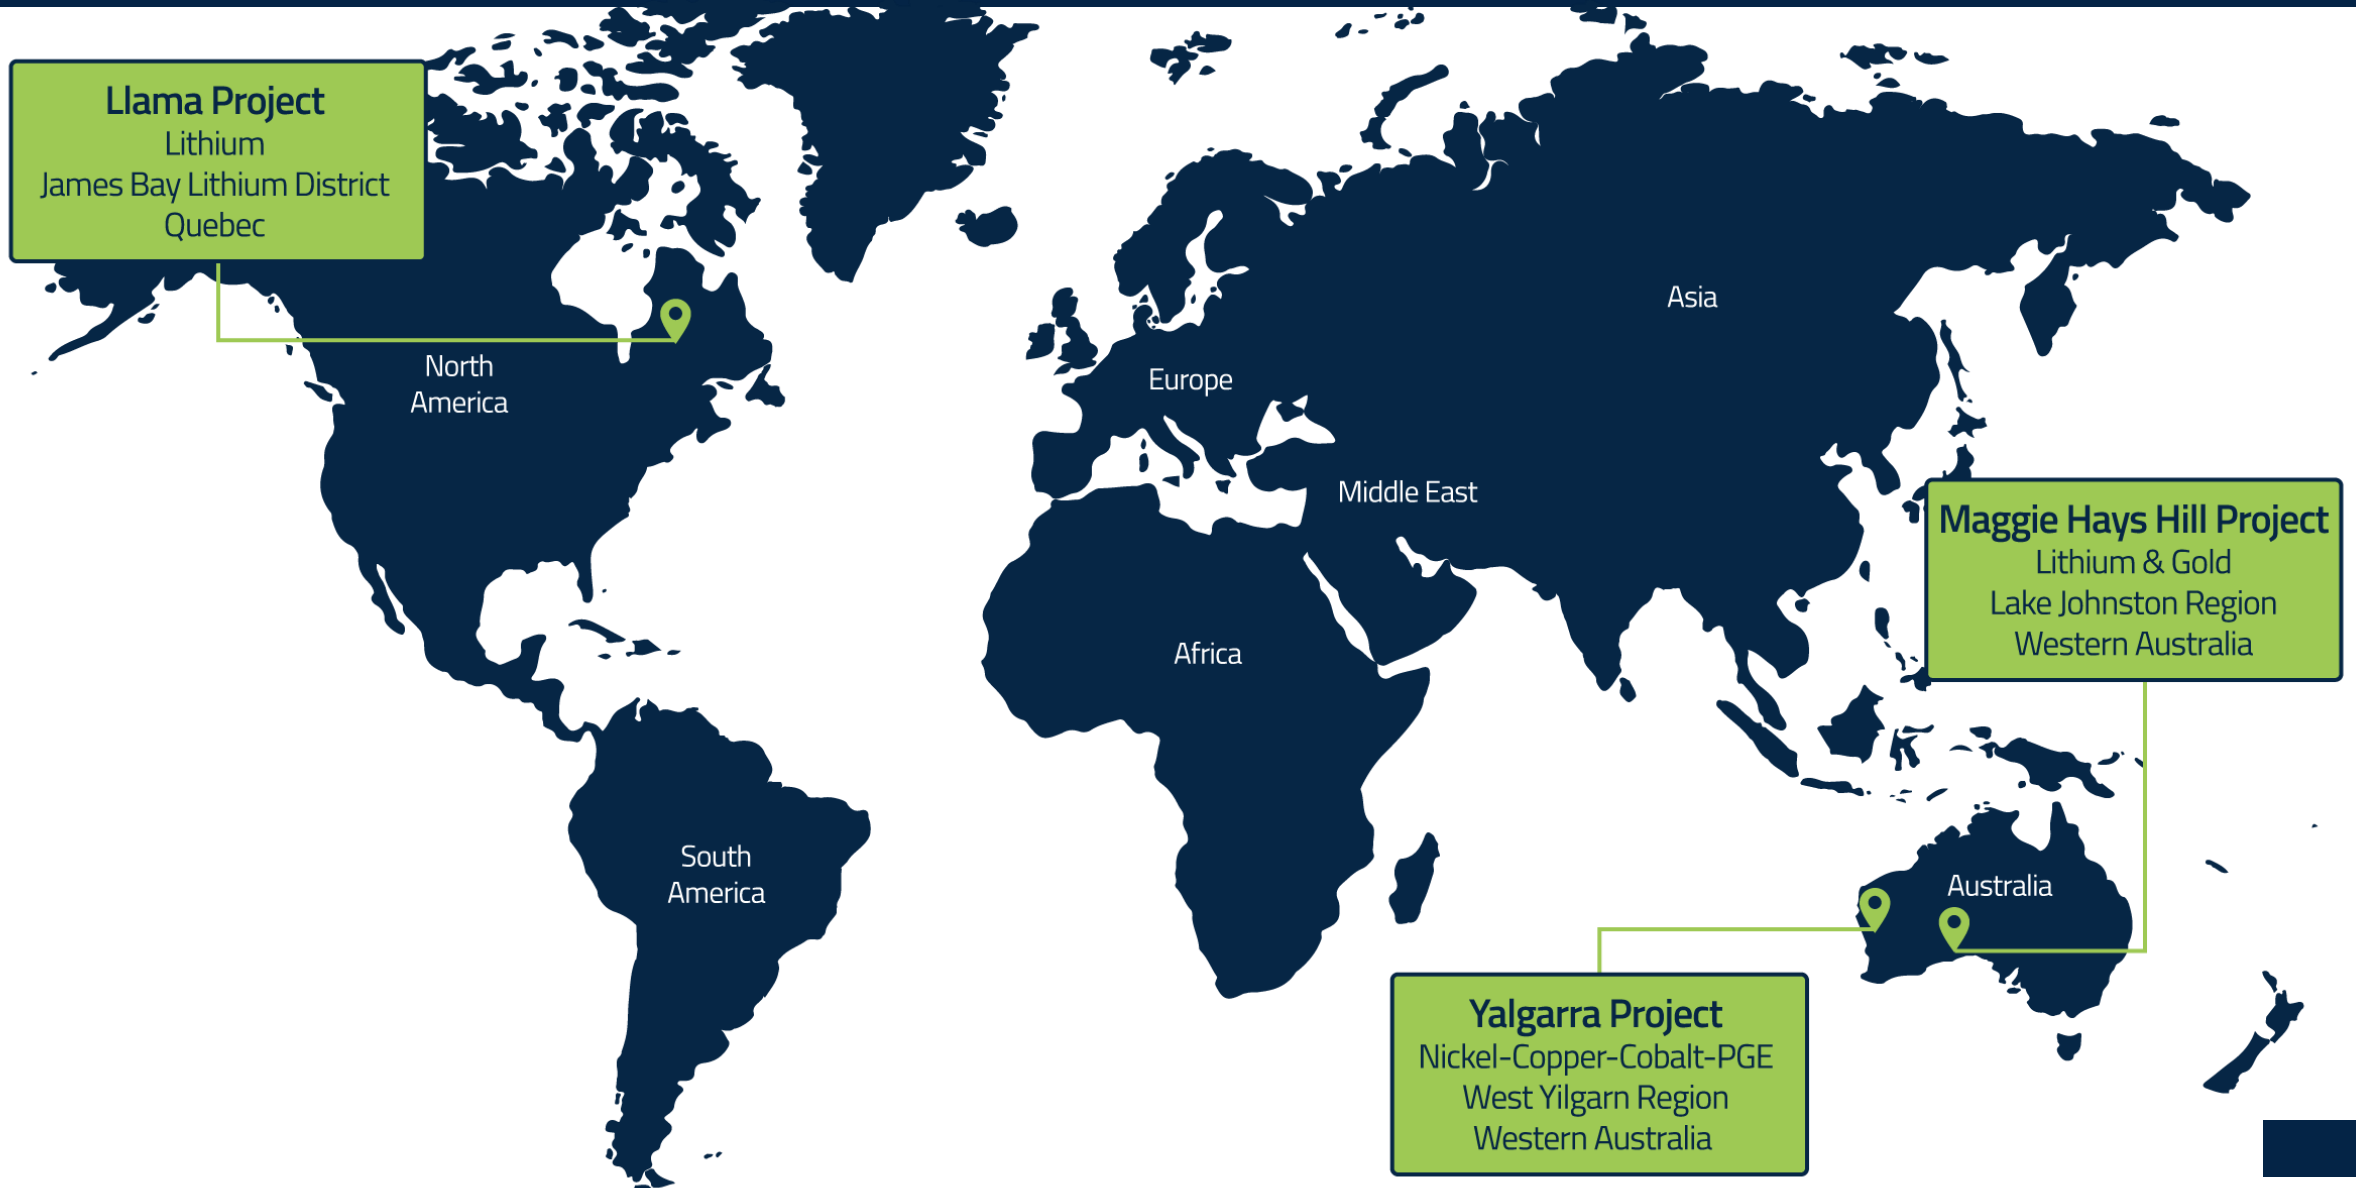

**Todd Hibberd**  
Principal Geologist and Exploration Manager

30+ years in exploration, resource estimation, mine development, production and corporate management.

Mr Hibberd is member of the Australasian Institute of Mining and Metallurgy and is considered a "Competent person" when reporting exploration and mineral resource estimates.

# Our Projects

Three high potential projects across tier 1 jurisdictions

# Maggie Hays Hill Project, Lithium and Gold Lake Johnston, WA

# Lake Johnston Lithium Province

Located **130km** West of Norseman, Southwest WA in the Lake Johnston Lithium province

**80%** ownership of license covering circa **49km<sup>2</sup>** of highly prospective tenure

License-wide exploration program incorporating Airborne Magnetics, soil & rock geochemistry, and LIDAR nearing completion

High-quality lithium and gold drill targets defined by field mapping and soil geochemistry

Initial exploration by neighbours in the vicinity of Maggie Hays has defined two new lithium spodumene deposits.

TG Metals (ASX:TG6): Burmeister Deposit with 20Mt @ 1.2% Li<sub>2</sub>O<sup>2</sup>  
Charger Metals (ASX:CHR) – Medcalf Deposit<sup>3</sup>

<sup>2</sup> ASX Release, "Burmeister Lithium Potential Defined", 1 May 2024.

<sup>3</sup> ASX Release, "Charger completes maiden drilling programme at Medcalf", 14 March 2023.

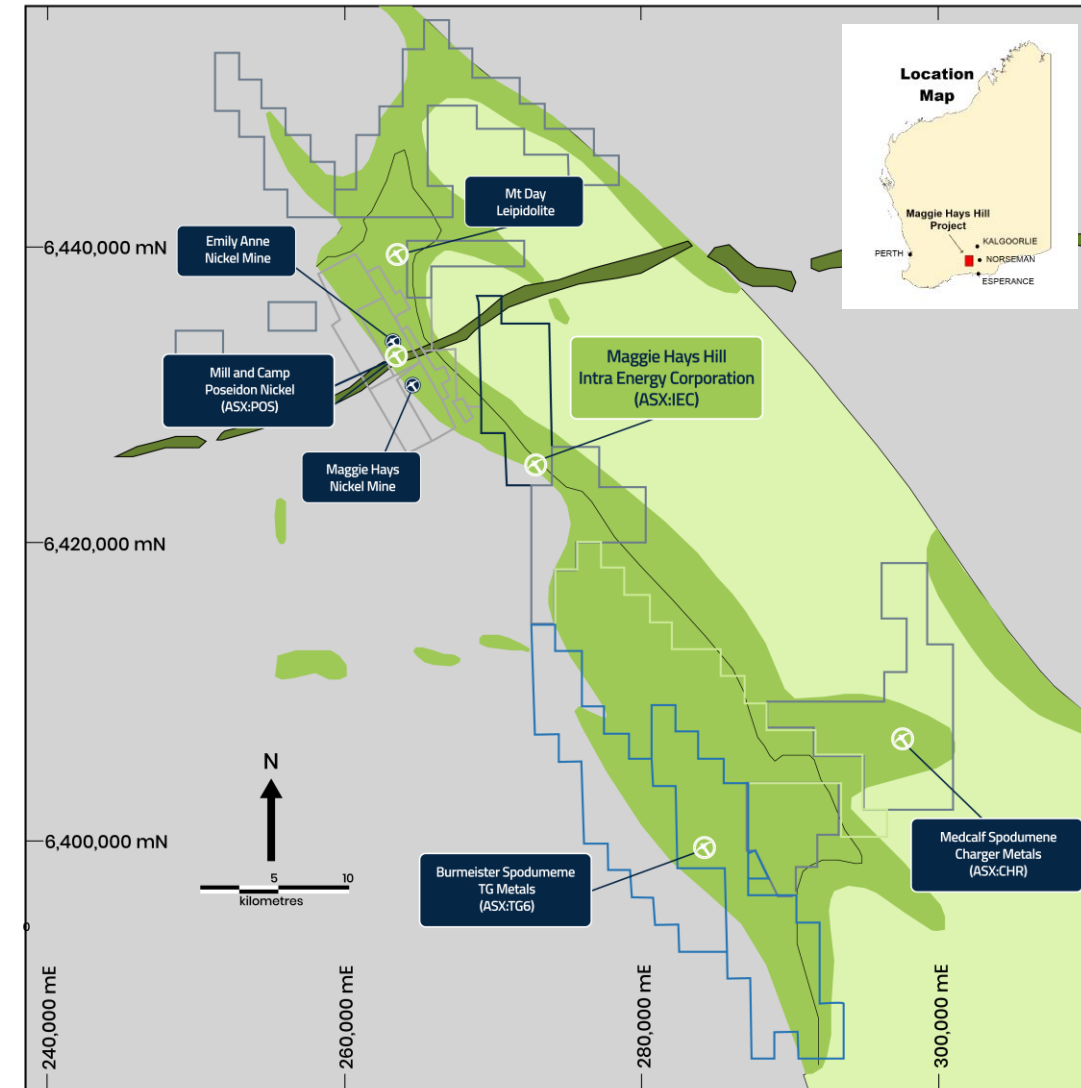

Figure 1: Tenement location map overlaid on geology

# Maggie Hays Hill Project

Two Commodities, Multiple Opportunities

## LITHIUM

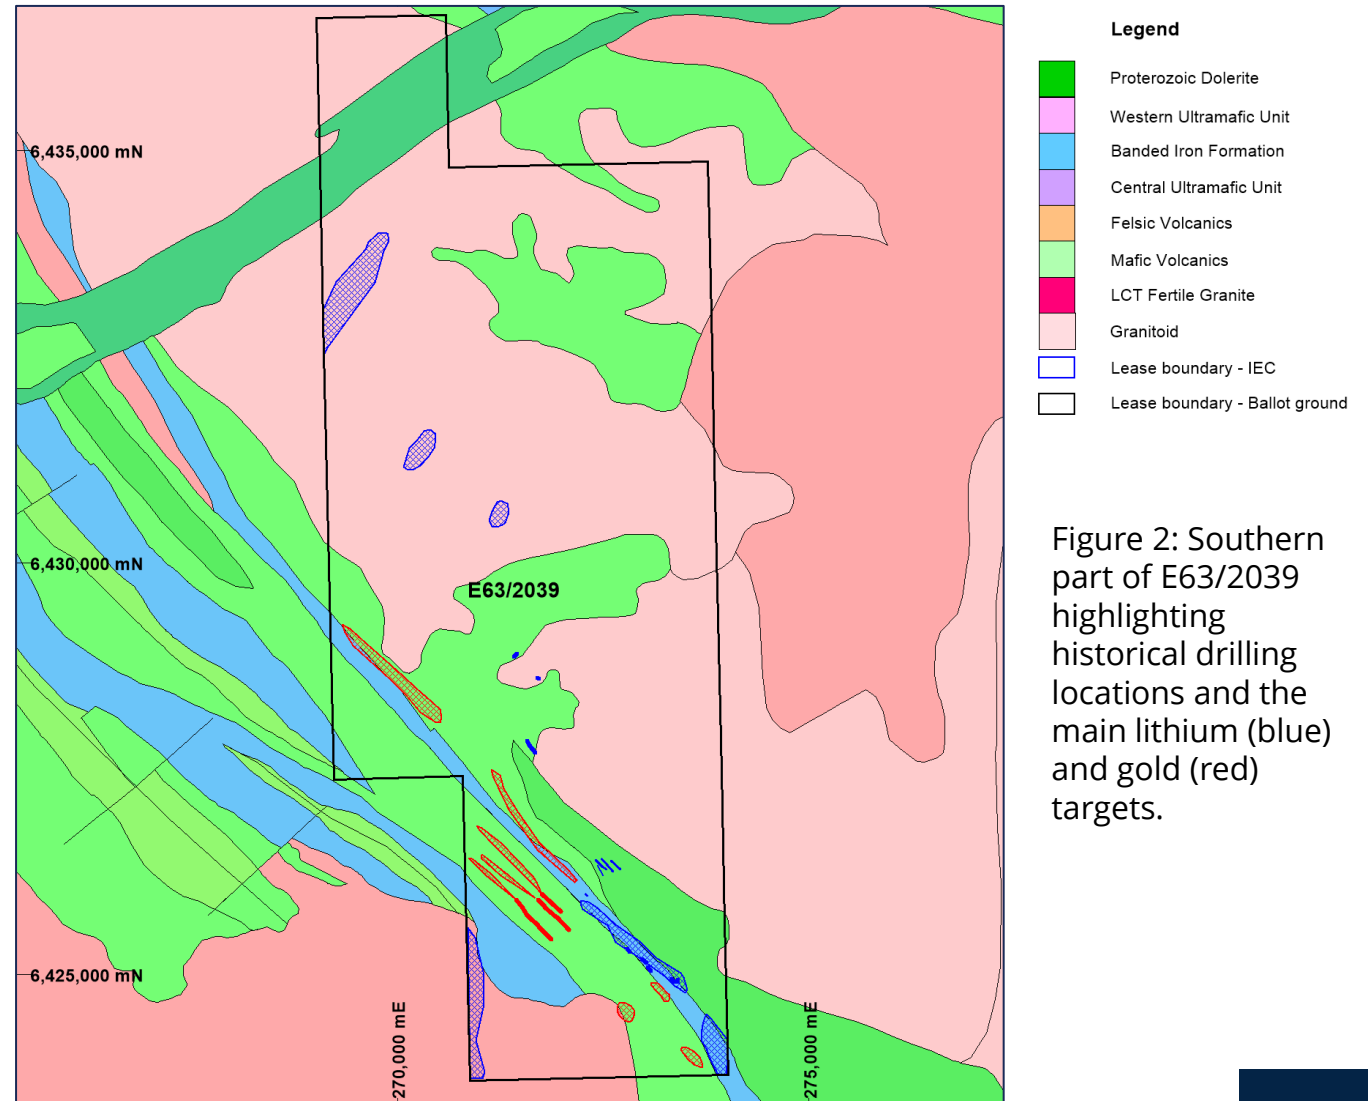

- Extensive outcropping pegmatite veins<sup>4</sup>
  - 2,500 metres long zone, 300 metres wide
  - Individual veins up to 50 metres wide
- Compelling geochemistry<sup>5</sup>
  - Widespread outcropping quartz reefs
  - Rock chip assays up to 17 g/t gold

## GOLD

- Program of work approved by DEMIRS
- Heritage survey and track clearing completed
- Drilling scheduled from July, initial results expected from September

<sup>4</sup> ASX Release, "Outstanding Rock Assays Update Lithium Prospectivity", 15 April 2024.

<sup>5</sup> ASX Release, "High grade gold identified at the Maggie Hays Hill Project", 4 March 2024.

# Maggie Hays Hill Project

## Lithium Prospects

- Extensive outcropping pegmatite veins
  - 2.5km long zone (blue outlines)
  - 300 metres wide
  - Individual veins up to 50 metres wide
- Pathfinder element values indicative of lithium enrichment zone:
  - Lithium : 500 ppm, Caesium 139 ppm
  - Tantalum 107 ppm, Niobium 57 ppm
- Crystals of beryl and spodumene identified at southern end of tenement

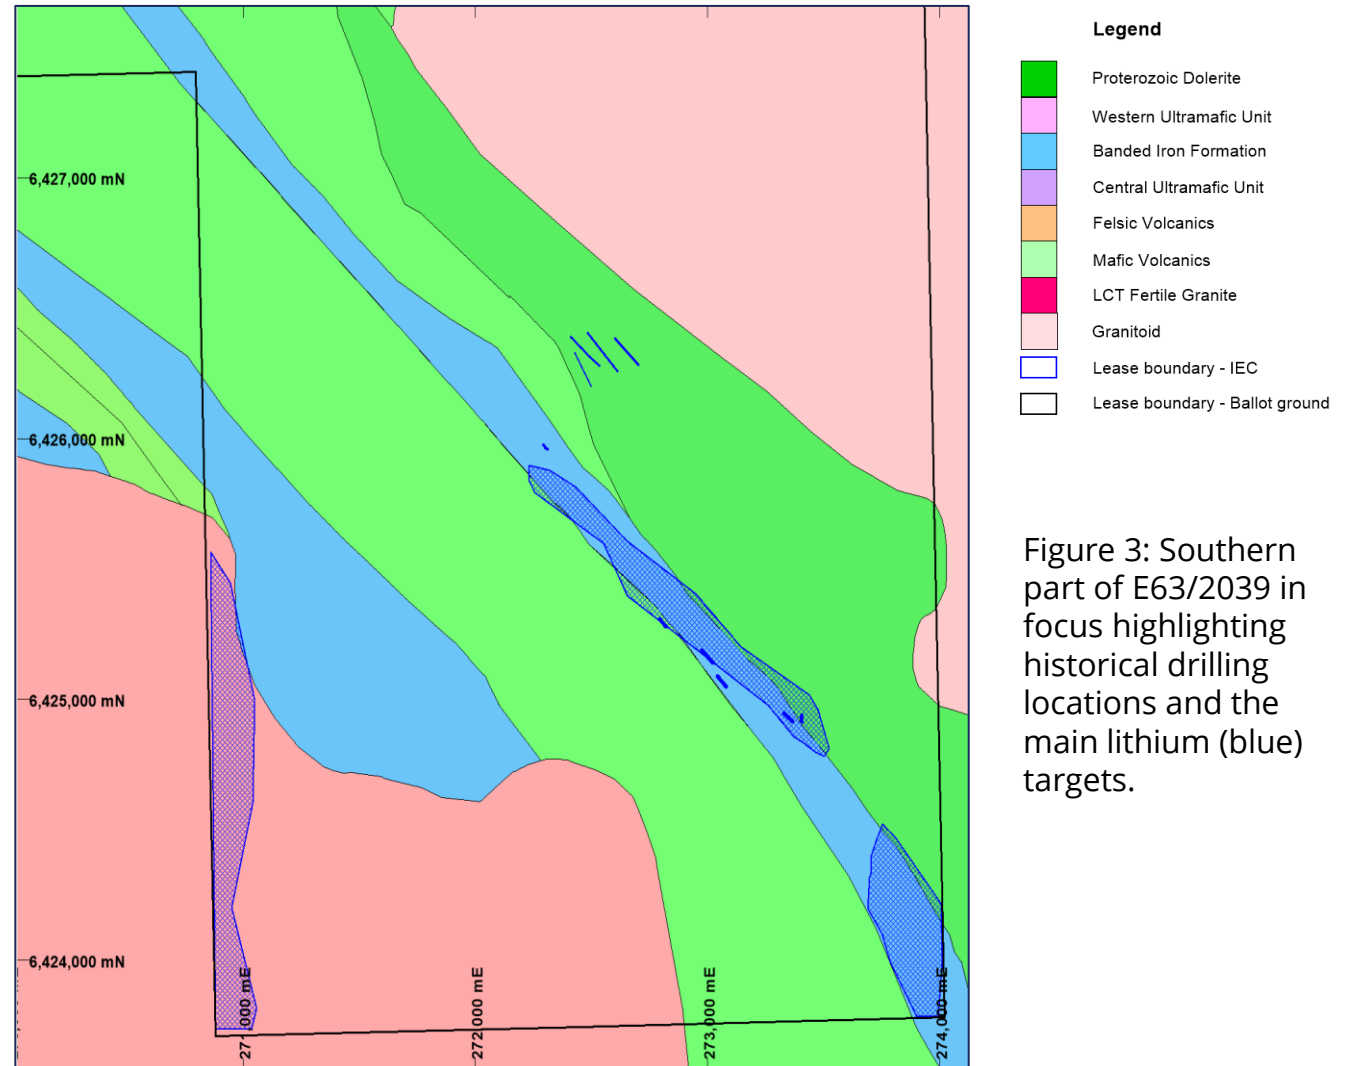

Figure 3: Southern part of E63/2039 in focus highlighting historical drilling locations and the main lithium (blue) targets.

# Maggie Hays Hill Project

## Gold Exploration

- Three compelling gold targets identified
  - Northern Gold Anomaly<sup>6</sup>
    - **1.5 km long** and 15-44 ppb gold
  - Central Gold Anomaly<sup>7</sup>
    - +300 metres long – open both ends
    - Multiple quartz reefs
    - Rock chip grades up to 17/g/t
  - Southern Gold Anomalies<sup>8</sup>
    - +30ppb gold soil results
    - Along strike from central gold anomaly

<sup>6,8</sup> ASX Release, "Further high-grade gold assays identified in quartz reefs at Maggie Hays Hill Project", 16 May 2024.

<sup>7</sup> ASX Release, "High grade gold identified at the Maggie Hays Hill Project", 4 March 2024.

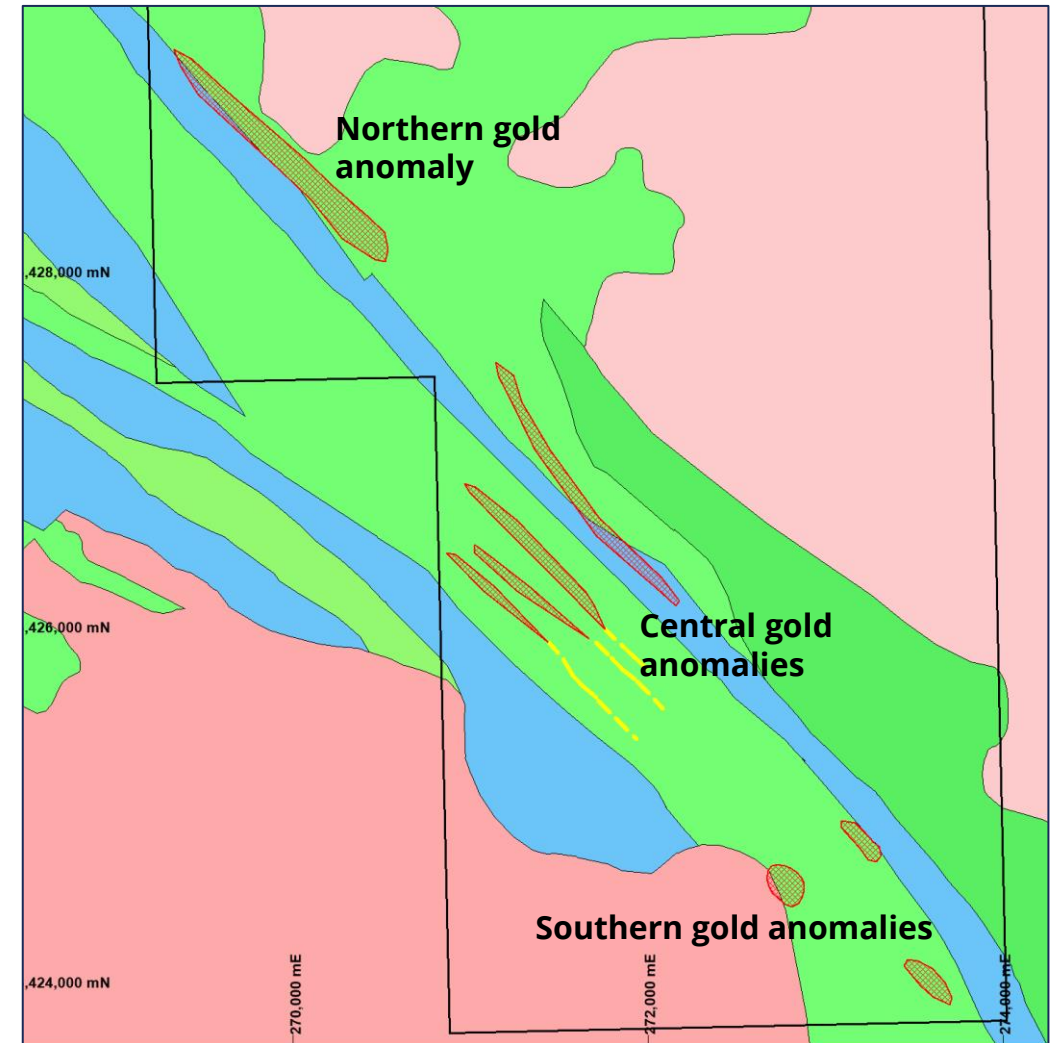

Figure 8: Southern part of E63/2039 highlighting northern, central and southern gold anomalies

# Llama Project, Lithium James Bay, Quebec

# James Bay Lithium District

## A Growing Lithium Province with World-Class Resources

- Situated in the heart of Quebec's James Bay Region, which is home to numerous world class lithium prospects
- 41km from the all-weather trans-taiga highway and associated hydroelectric facilities.
- Llama is in close proximity to multiple high-grade lithium discoveries and developing mining operations including:
  - **Winsome Resources (ASX:WR1)**  
Adina Lithium Project
  - **Patriot Battery Metals (TSX:PMET) (ASX:PMT)**  
Corvette Project
  - **Arkadium Lithium (NYSE:ALKM) (ASX:LTM)**  
James Bay Lithium Project
  - **Nemaska Lithium (TSE:NMX)** Whabouchi Mine

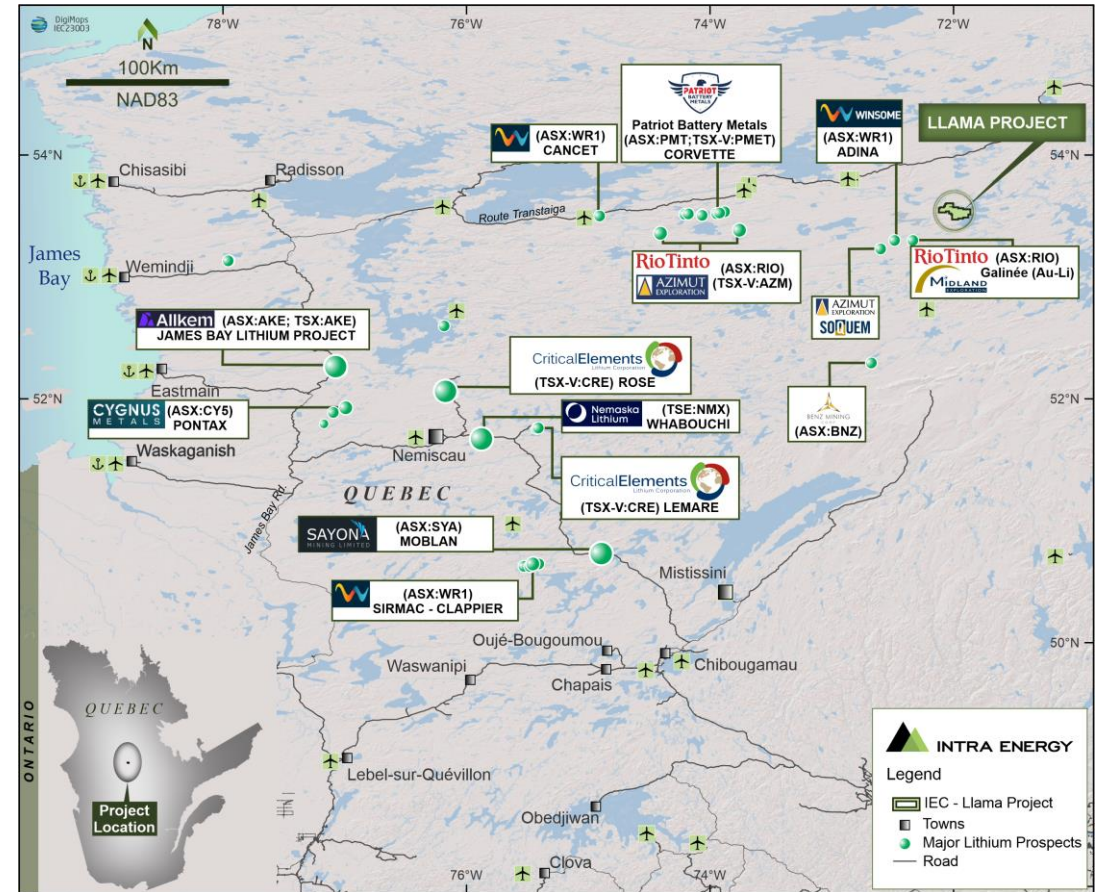

Figure 9: James Bay Lithium District, Quebec and high-grade lithium discoveries and mining operations

# Llama Lithium Project

## Geological Potential

- Llama lithium project acquired in May 2023 and approved by shareholders in July 2023
- 123 mineral claims, covering 63km<sup>2</sup>
- Project Charlie comprising 12 mineral claims containing visible pegmatites and adjacent to Llama acquired in September 2023, increasing total package to **135 mineral claims covering 75km<sup>2</sup>**
- The property lies within the volcano-sedimentary (greenstone) rocks of the Dalman and Escale formations

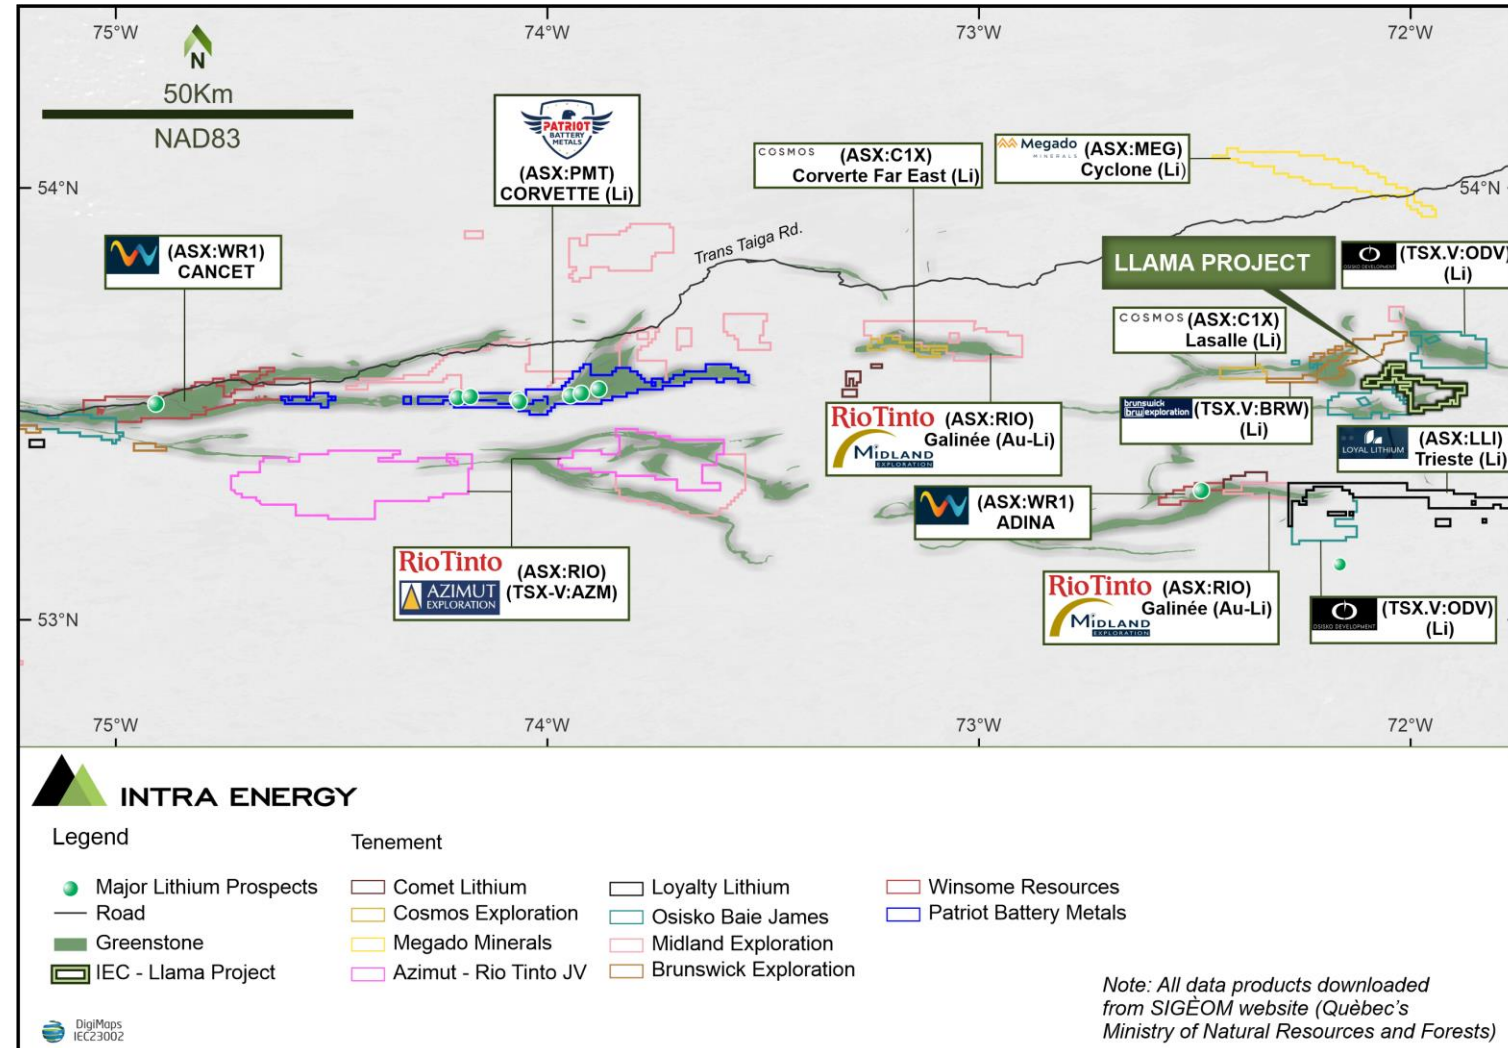

Figure 10: Location of Llama Lithium Project – Quebec, Canada

# Yalgarra Project, Nickel, Copper, Cobalt and PGE West Yilgarn, WA

# Yalgarra Project

Situated in the Emerging West Yilgarn Ni-Cu-PGE Province

Located **125km** east of Kalbarri, WA in the northern sector of the West Yilgarn Ni-Cu-PGE province

**70%** ownership of license covering circa **400km<sup>2</sup>** of highly prospective tenure

License-wide exploration program incorporating Airbourne EM, soil & rock geochemistry, ground EM and IP nearing completion

High-quality drill targets identified focusing on magmatic nickel-copper-cobalt-PGE mineralisation

Initial exploration by neighbours in the vicinity of Yalgarra has defined several new magmatic Ni-Cu-PGE±Au prospects

Potential lithium mineralisation identified in the top areas of the Northern Block, presenting an opportunity for a new lithium province

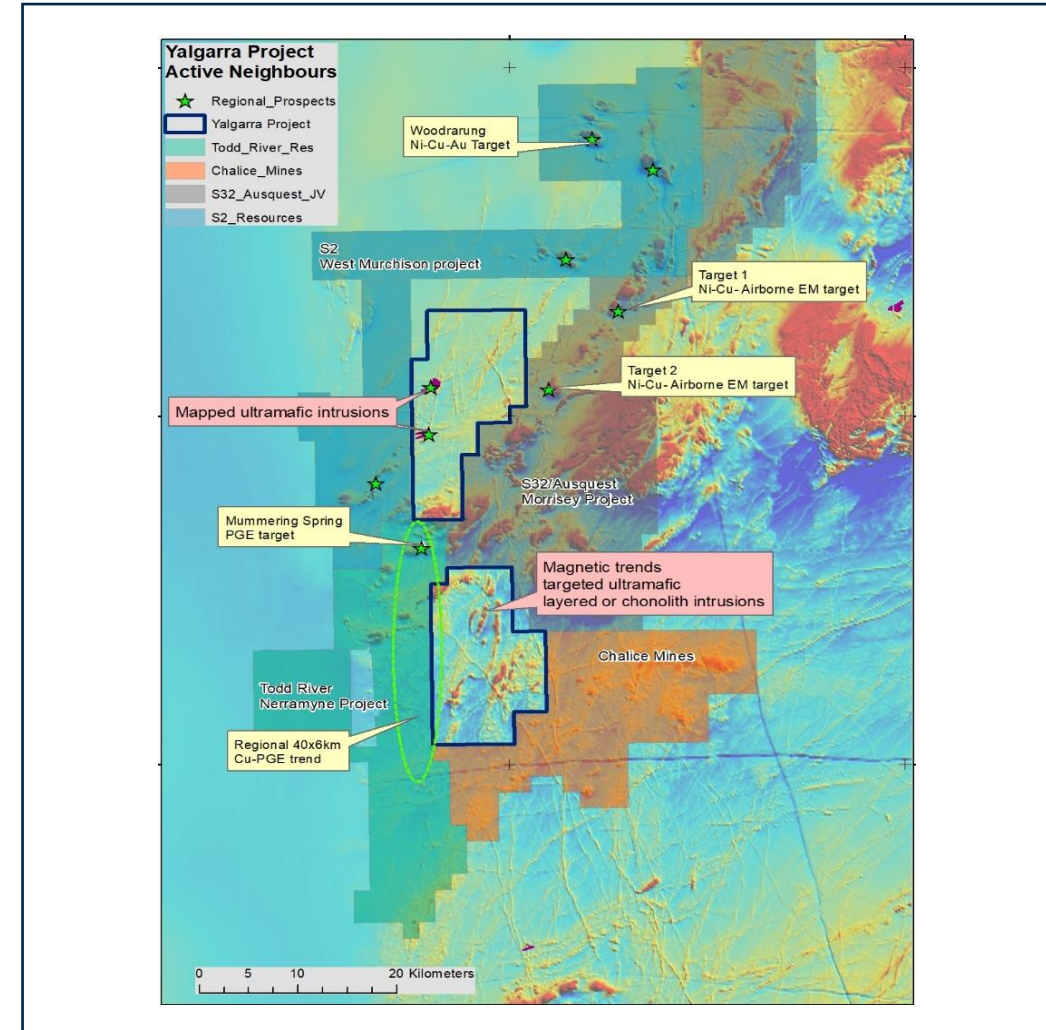

Figure 11: Yalgarra Project, key targets and active neighbours
