Forecast Thermal Coal Pricing

Source: Historical from globalCOAL, Forecast from GFI Group (28 October 2024)

Pricing seems to have stabilised and is supported into the near future.

- The average price for 2011 – 2020 was US\$83 per tonne.
- The average price for 2021 – Sept 2024 was US\$206 per tonne.
- The forecast average price Oct 2024– December 2027 is US\$152 per tonne.

Thermal Coal Demand

Wood Mackenzie forecasts global demand to largely remain flat to 2030. Advanced economies face structural demand decline to 2050, while developing economies see demand growth.

Source: Wood Mackenzie, February 2023.

Short Term

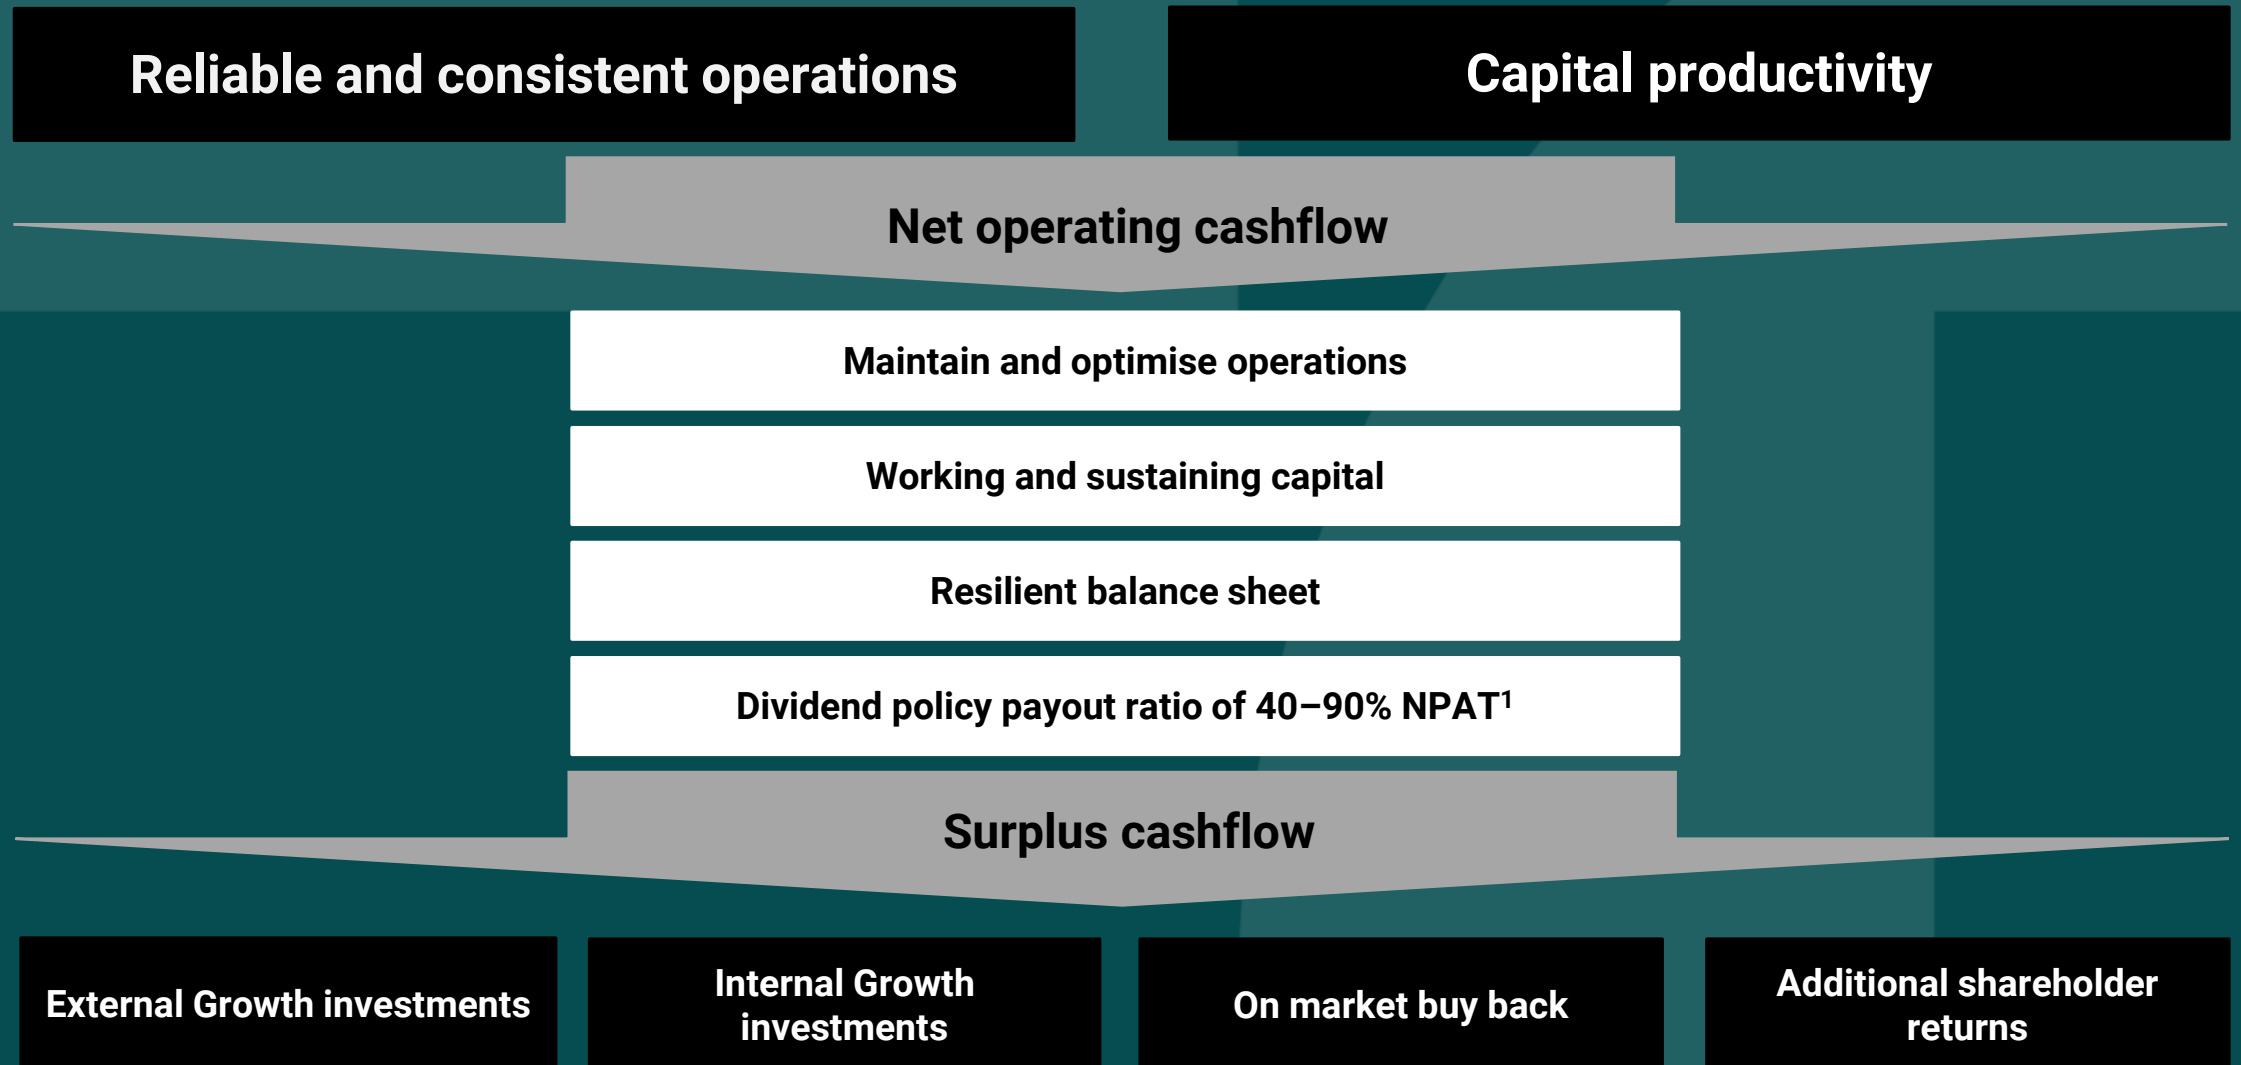

"Energy transition is delayed leading to stronger near-term coal demand.

Energy security and cost are valued with coal-fired generation capacity growing in Asia in the short to mid-term, anchored by China, India, and Southeast Asia. "

Source: Wood Mackenzie, May 2024

- TerraCom primary markets (Japan, Korea and India) have consistent demand to 2030 and beyond.
- Upside risk from La Nina delivering a colder than expected winter in ASIAPAC demand centers and elevated rainfall for suppliers.
